Delegation visit to Indonesia

14th – 17th March 2016 | Jakarta

Welcome

Mr. Per Hagen
Regional Director
INTSOK

Ms. Diah Noor
Local Oil & Gas Advisor
INTSOK

INTSOK representing the capabilities of the Norwegian oil and gas cluster invites you to be part in the delegation visit to Indonesia 14th – 17th March 2016.

Indonesia's oil production has started to stabilize at more than 800,000 mbpd. It is expected to increase further reaching more than 900,000 mbpd with a number of oil fields come into production in 2016. Indonesia will also rejoin the OPEC in December 2015 after seven years of absence to strengthen its cooperation with oil-producing countries, provide greater access to crude oil supplies, and allow the country to be a link between energy producers and consumers.

Despite decades of exploitation, Indonesia's oil and gas upstream sector remains one of the most attractive businesses in the world. Interest from foreign oil and gas companies in Indonesia remains strong. BP has invested a further US\$12 billion for the expansion of Tangguh onshore LNG plant; a number of major oil and gas operators are seeking extension for their exploration fields; Chevron, INPEX and ENI have also invested billion dollars to develop deepwater projects with other operators to follow. State oil and gas PERTAMINA, a key player in the market, plans to develop several infrastructure development projects to tap LNG market in the near future.

Significant opportunities exist particularly in frontier areas and offshore deepwater exploration (Eastern part of Indonesia), an emerging area in Indonesia, and one which the Indonesian Government is keen to focus much of its efforts on. Other opportunities also exist in Enhanced Oil Recovery (EOR) technology to increase oil production (32 potential oil fields for EOR), supply of subsea equipment & services, LNG receiving terminals and regasification facilities.

We are looking forward to seeing you!
