

SPONSOR AND PARTNERSHIP REQUEST

“NORWAY-PHILIPPINES MARITIME & ENERGY CONFERENCE - *Creating Currents Together*” is an event that will be organized in conjunction with the visit of Norwegian tallship Statsraad Lehmkuhl on her One Ocean Expedition, and will be held in Manila, Philippines 13-14 October 2022.

The aim of the conference is to increase opportunities and collaboration between Norway and Philippines by creating a venue and a meeting place to present Norwegian companies, solutions and technology to stakeholders, decision makers, influencers, and government officials from Philippines. Potentially there could also be high level political participation from both countries.

Conference host and moderator will be Ms. Nisha Pillai, a former BBC news presenter, well known on the international conference scene hosting numerous maritime and energy events.

In addition to the main conference, there will be one or more receptions on board the ship and it will be possible for companies to host their own side events as well. The main conferences will be held at The Peninsula Hotel and the ship will be docked in the Manila Harbour.

The Energy part of the conference on **14 October** will focus on topics such as Offshore Wind, Floating Solar, Hydropower and LNG, all areas where Norway have good knowledge and expertise and all current or future energy sources for the Philippines. Partners confirmed for the event includes Asian Development Bank (ADB) and Norwegian Energy Partners (NORWEP).

As an important player of the industry, we would like to invite you to be a sponsor for the energy conference. We believe this will be valuable for the company and the conference as whole to have you on board. For your convenience, various levels of sponsorship and associated benefits are detailed on the next page.

We thank you for considering this request for sponsorship, and we are looking forward to further discussions with you on the subject should it be of interest. Without doubt, we can *Create currents together* to further strengthen the relations between the Philippines and Norway in the energy sector.
