

Being a NORWEP partner

This is Norwegian Energy Partners

Norway is a country with fantastic energy resources. For more than a century we have built our country on developing energy solutions in a sustainable way within a wide range of areas, from upstream and midstream oil & gas to energy systems, offshore wind, hydropower and solar energy.

We are promoting Norwegian energy capabilities in international markets.

Norwegian Energy Partners - providing solutions for global energy needs.

About

- NORWEP is an independent non-profit foundation established to strengthen the long-term basis for value creation and employment in the Norwegian energy industry through facilitation of the industry's international business activities.
- We have more than 330 partners/company members from the Norwegian offshore, energy and maritime industries.
- We promote the Norwegian energy industry in overseas markets and provide market and project information to our partners.
- We map the competence, technology and competitiveness of Norwegian suppliers and match with international demand.
- We contribute to improve the industry's competitiveness and reduce risk in connection with international activities

Our markets & international competence

With an extensive international network and local advisors in key markets, we identify new business opportunities and open doors for the Norwegian energy industry around the world.

Our energy advisors have an extensive international network of industry contacts and deep local knowledge. This knowledge is even more important in the years to come as sales propositions will need to focus even more on the value for the customer.
